

Using Aroma to create the perfect environment

1. Not all essential oils are equal. We suggest doTERRA because they are the most tested, pure and therapeutic essential oils available.
2. Less really is more. Subtle aromas are pleasing but overpowering smells will make your buyers run for the hills.
3. Citrus oils tend to be light and uplifting and appeal to the masses.
4. Choose a diffuser that works for the size of room you are in. Our personal favourite is a water based sonic diffuser as they are the most cost effective and efficient.
5. Set your diffuser up at the beginning of every showing. Most have a variety of settings upto 6-10 hours of running. You only need about 6-8 drops if using doTERRA oils.
